CCAR Aligns with GMG EnviroSafe as Industry Compliance Partner

The Coordinating Committee For Automotive Repair (CCAR) announced a joint venture with GMG EnviroSafe, based in Winnetka, Illinois, as a compliance partner for the automotive collision repair industry. In addition to online training, collision repair businesses will have access through CCAR to the process, materials and support provided by EnviroSafe to implement an environmental compliance process.

EnviroSafe provides compliance products and services for collision repair facilities through offsite and onsite support. Formed in 1989, EnviroSafe focuses helping shops in protecting profitability, reducing areas of risk and loss, and remaining current with industry regulations.

"We are proud to welcome EnviroSafe as a Compliance Partner," said Daren Fristoe, CCAR President and Chief Operating Officer. "The combination of CCAR and EnviroSafe represents a milestone in our organization's history, as we add the extensive capabilities of EnviroSafe's offsite and onsite compliance processes to our successful S/P2 e-learning program. We believe that our joint customers will be well-served by utilizing both e-learning and the process, materials and support provided by EnviroSafe."

"Combining the complementary resources of both organizations represents a win-win-win - for our customers and both organizations," said Joe Hayes, EnviroSafe President. "CCAR's e-learning is now complemented with the materials and coaching for shops to implement a cost-effective, professional compliance process as part of their management system," he added.

CCAR operates CCAR-GreenLink, the National Environmental Compliance Assistance Center for Automotive Repair, in cooperation with the U.S. Environmental Protection Agency (EPA).
